

A Nurse's Heart

Being a nurse for over 16 years, I have heard and seen my share of surprises in the health care field. I recently started a new position working in urgent care. Some people may or may not be familiar with the difference between the ER (emergency room) and urgent care. The ER handles trauma and lifethreatening issues such as burns, broken bones, head injuries, lacerations, change in mental status, etc. Urgent care handles minor illnesses, injuries, cuts, sprains, strains, small cuts, etc. when your regular doctor is not available and you can't wait for an appointment. There are many adults coming into urgent care with complaints of side effects AFTER receiving the COVID vaccine. Most of us usually would not go to the doctor for nausea, diarrhea or vomiting. But it appears to be that the side effects are so bad, people don't know what else to do and seeking medical help.

According to the CDC for both Moderna and Pfizer-BioNTech brands side effects reported are: pain at the injection site, tiredness, headache, muscle pain, chills, joint pain, swollen lymph nodes in the same arm as the injection, nausea and vomiting, and fever.

But today, I want to inform readers of the side effects of the COVID vaccine not being mentioned. For anyone even considering taking ANY brand of this vaccine, please diligently and willfully seek the Lord in prayer. I STRONGLY and SINCERELY am against it! My current employer does not require us to get the COVID vaccine, neither do we offer it. But as a healthcare worker, we're considered in "Phase 1A" according to the CDC website.

Over the last 3 weeks, patients who have been vaccinated are coming into urgent care with "other symptoms" not mentioned:

-coughing up blood

-chest pain

-shortness of breath

-persistent/unusual cough

-swelling/pain/soreness (to the entire arm, not just at the injection site)

-positive COVID test

*By law (in an urgent care setting), we cannot treat anyone with shortness of breath or chest pain. We refer them to the nearest ER. But the patients' we do see with other symptoms, there is not much the doctor can do to treat this. Except to suggest taking an OTC medication. Once you get the vaccine..IT IS IRREVERSIBLE! Many may think the vaccine is **NOT** the "Mark of the Beast"*

Revelation 13:17 KJV “And that no man might buy or sell, save he that had the mark, or the name of the beast, or the number of his name.”

But taking a much deeper look, why in the world would this vaccine be so mandatory according to the powers that be? I believe it is a prelude of what is to come. The vaccine should be optional just like other vaccinations.

So far, I only know of 3 co-workers who voluntarily received the COVID vaccine. A male co-worker had both doses and only after that, he reported “a chemical-like smell” in his nostrils. A female co-worker received only one dose (Moderna) and had an outbreak of Shingles 2 weeks later.

On 1/16/2021, I took a nap on my couch and had an unexpected dream vision. I reside in an apartment complex and heard very loud footsteps and knocking on my neighbors’ door. I heard a man ask, “Have you gotten your vaccine?” After I woke up, my heart was racing so fast. Trying to gather my thoughts as to what I had just heard. This seemed unreal! I looked at a text message my sister sent (who resides in Chicago) saying, “Why is the National Guard here giving vaccines?!”

I pray that sharing what I have seen firsthand will enlighten and open the eyes of many believers. And even those who will share this with family, friends, co-workers, etc. Let’s not forget so many that are “dying” as a result of the COVID vaccine. This is just the beginning and I definitely continue to share even more.

Mark 4:9 KJV “And he said unto them, He that hath ears to hear, let him hear.”

May God Bless us all and He will continue to strengthen us in these last days!
