

The Case of The Little Children-Who is Accountable?

McKana, September 20, 2021

Matthew 19:14(KJV)

But Jesus said, Suffer *little children*, and forbid them not, to come unto me: *for of such is the kingdom of heaven.*

Matthew 18:2-4

2 And Jesus called a little child unto him, and set him in the midst of them,

3 And said, Verily I say unto you, Except ye be converted, and become as little children, ye shall not enter into the kingdom of heaven.

4 Whosoever therefore shall humble himself as this little child, the same is greatest in the kingdom of heaven.

-----//////-----

This is the news of the day, the children at risk.

September 20, 2021

Nearly 226,000 Covid-19 cases were reported in children last week, pediatrician group say.

(CNN) Covid-19 infections have continued to increase "exponentially" among children across the US, and now account for nearly 26% of all cases reported nationwide, according to data published Monday.

Over the past week, the American Academy of Pediatrics reported the second highest total of new diagnoses among children over the course of the pandemic, with 225,978.

That is a slight decline from the week before, when 243,373 new cases were reported.

The rise in cases comes as many students return to classrooms while not yet eligible for Covid-19 vaccines. Studies are underway for younger children, but currently only children 12 and older can get inoculated.

Health experts and officials have expressed concern about keeping young students safe until a vaccine is authorized for them.

"After declining in early summer, child cases have increased exponentially, with over 925,000 cases in the past four weeks," AAP said in a statement.

Children still less likely to suffer serious disease

The weekly case number reported Monday is about a 215% increase in cases among children since the week of July 22-29 when the group counted 71,726 cases.

As of September 16, more than 5.5 million kids have tested positive for Covid-19.

There is no question that the Lord, Almighty God protects children. No one touches the defenseless little babies and children or suffer what comes from the Lord. When parents are the first to protect children, what happened recently is a big question of accountability.

Parents, thinking they are vaxed, protected and immunized go out trusting the words of the authorities that they are protected come back home infected. Now we know the vax doesn't fully protect from infections of the Delta variant(is that only the Delta?). Not only that, they also transmit the infection. When parents come from outside infected, who is the first victims? the children. What was not seen in the early days of the pandemic are surfacing now.

In the first place, the accountable to the case of the children are parents. Whether knowingly or unknowingly, parents trusted what can't be trusted. The second in line for accountability are the makers of the product, pushing the authorities to believe and trust what they produced is safe and protective. The third in line are the authorities who without realizing the outcome of this drama went out to

convince the public that the VAXs are good, safe and protective. At the end, the victims became to be the poor little children of the Lord.

Make no mistake, the Lord will not watch the little ones driven to be the next targets for the jabs. They can't decide for themselves. Who is deciding for them, the parents? The makers of the product? The authorities?

We knew that, before every one, the Lord will take care of the little ones. Before anything happens, trust the Lord, He will take measures in a way no one expects.

Much before this news, we have been asking who is accountable for what will happen to the children. As we foretold, it came to pass.

These days, there is nothing and no one to trust. Are the data speaking the truth? Are the numbers played with? Real, under numbered or exaggerated? Are they building their case to VAX the children?

The Lord has warned about the short and long term effects of the jabs.

One point which needs to be stressed is:-

In science, immunity is built through exposure. The chance of building immunity is higher in exposure to infectious agents though age. The aged the person is, the exposure to infectious agents are high, hence the immunity is built through time, exposure to different virus in this case. Compared to little children, adults and middle aged are supposed to have better immunity. True, elders might have weak immunity. This long, the children who are supposed to have less immunity, compared to the adults were kept safe. Until this vax came and parents are jabbed, children were safe.

Contrary to scientific principles and beliefs, children remained safe this Long. Who was protecting them? Now, the facts tell the story. Not only little children, the people of less fortunate, low income nations are protected by the Lord. Have Faith. This is the truth. Now, the safety of children is breached by lack of accountability.

The other truth is, elders and seniors who contract this pandemic in large numbers are not cursed or lack immunities. The reason, in short, which is not seen by the experts is, male adults elderlies have more receptors for the spike protein than female elderlies and the young. You want more on this, the scientific literatures have it written and recorded.

Watch, the short and long term effects of the the jabs, soon to be seen globally for all.

The little children belong to the creator, Almighty God our Lord. God will protect the little children.

Dear Lord -Have Mercy, Save The Little Children!
