

The “worst variant” and the “Super-contagious” Omicron mutant!

McKana, July 13, 2022

Psalm 94:9-12(KJV)

9 He that planted the ear, shall he not hear? he that formed the eye, shall he not see?

10 He that chastiseth the heathen, shall not he correct? he that teacheth man knowledge, shall not he know?

11 The LORD knoweth the thoughts of man, that they are vanity.

12 Blessed is the man whom thou chastenest, O LORD, and teachest him out of thy law;

-----/-----

The story of corona the pandemic is rampant mutation, sickness, death and enormous burden on the global society.

Corona the pandemic is not yet gone. As long as there are large number of new cases, there is a danger of few deadly more infectious casess urfacing through time. Mutations come with ***resistance to natural as well as induced immunity as in the cases of any “vaccine.”***

Currently, with the daily cases of 85-100,000, combined with the lack of proper hygienic and personal protective measures, the cases and deaths are expected to rise.

At this time, the officially recorded total cases of 90, 000,000 and deaths of over 1,000,000 might sound big. With the arrival of new, more infectious and deadly mutants, another 100million cases and more deaths are right around the horizon.

The Lord has revealed to me that the number of daily deaths can mount up to and over 5,000. When I gave this number, many might have been surprises. With the new mutations, which are known now and with more different mutation coming, this number is a reality in the coming seasons.

The new mutant variant- Omicron BA.5 is said to be more infectious and can evade the “presumed” immunity from the Vaxes which have already waned and keep waning. Here is a small clip about one of the new variants.(If you can, read the whole news)

“The 'worst variant' is here July 13, 2022

(CNN)Nearly two-and-a-half years since the coronavirus pandemic began, the most infectious and transmissible variant yet has arrived.

Repeated Covid-19 waves have left millions of people dead, with only vaccines helping to blunt the toll. Now the virus is spreading again — evolving, escaping immunity and driving an uptick in cases and hospitalizations. The latest version of its shape-shifting, BA.5, is a clear sign that the pandemic is far from over.

the same variant has become the dominant strain in the United States, where it accounted for 65% of new infections last week, according to the Centers for Disease Control and Prevention (CDC)

Some experts think there could be as many as 1 million new infections every day in the broader US population — 10 times higher than the official count.

--- BA.5 can easily evade immunity from previous infections and vaccines, increasing the risk of reinfection.---

The world is not done with the above and a new ***“Super-contagious variant”*** is in the horizon. Soon, in the coming seasons, the super-contagious is going to overlap with and take over the ***“Worst”*** variant. Still in the news:-

“New coronavirus mutant raises concerns as it spreads across India and beyond

AP -The quickly changing coronavirus has spawned yet another super-contagious Omicron mutant that's worrying scientists as it gains ground in India and pops up in numerous other countries, including the United States.

Scientists say the variant — called BA.2.75 — may be able to spread rapidly and get around immunity from

vaccines and previous infection. *It's unclear whether it could cause more serious disease than other Omicron variants, including the globally prominent BA.5.*

"It's still really early on for us to draw too many conclusions," said Matthew Binnicker, director of clinical virology at the Mayo Clinic in Rochester, Minnesota. "But it does look like, especially in India, the rates of transmission are showing kind of that exponential increase."

Whether it will outcompete BA.5, he said, is yet to be determined.

*The latest mutant has been spotted in several distant states in India, and appears to be spreading faster than other variants there, said Lipi Thukral, a scientist at the Council of Scientific and Industrial Research-Institute of Genomics and Integrative Biology in New Delhi. **It's also been detected in about 10 other countries, including Australia, Germany, the United Kingdom and Canada. Two cases were recently identified on the West Coast of the US, and Helix identified a third US case last week.***

*"We would like to return to pre-pandemic life, but we still need to be careful," she said. " **We need to accept that we're now living with a higher level of risk than we used to.**"*

I have the data to show about the current cases of the corona pandemic. As indicated above the numbers are in the ranges of around 100thousand a say.

This as it is, it will be proper to show some numbers about the underestimated Monkeypox.

Monkeypox cases around the world

July 13, 2022

#	Date	Cases	Geographic Distribution	comment
1	June 6, 2022 Global cases	780 confirmed	30 countries	
2	June 15, 2022 „	1,900 „	30 „	
3	June 27, 2022 „	4,100 „	40 countries	
4	July 1, 2022 „	5,320. „	50 countries.	
5	July 6, 2022 „	7,100. „	50 countries	
7	July 13, 2022 „	10,400.	60 countries	Pandemic?
	„ UK	1,735 „		
	„ Spain	2,447 „		
	„ Germany	1,694 „		
	„ France	721 „		
	„ Canada	477 „		
	„ US	929 „	29 states	

Global cases from 700 to 10,000 in one month.

US from small number of 70 to 929.

For the details of the updated July 13, 2022 cases, see here:-

The not much spoke about deadly VHF (Viral Hemorrhagic Fever) is one of the biggest concerns. The world is not paying enough attention. This is the one which is going to be the main killer. With the current data, VHF has a killer rate of 35-40%. This is an RNA virus which can also mutate.

It is first detected in Iraq with current case around 212. More larger numbers are detected in one other country and some in another which is not publicized yet to be disclosed. Knowing it is going to be a big news for the world and eventually coming to the west, this is the most feared Pandemic which **need**

more attention. It is not a matter of let us wait and see. The world need to prepare for this “to be” a major pandemic. The Lord knows all, Like the other pandemics we are warned that it will eventually become a killer global pandemic. In all cases, there is no substitute to personal hygiene, personal protective care and above all trust in the Lord.

The Widow of Mercy will not remain open for long!
Repent! Repent! Repent!
