Major, Major, Major Earthquakes in Africa.

Not perfectly representing the specific location-somewhat.

I was tired from last night, closed my eyes to rest. In a while, I see the map of the world from above, focused in africa. I see many major earthquakes in Africa. There are three four big quakes at the region of the Congo, some down south and some North and Northeast. Many are concentrated in the region of the Congo.

These are not the usual earthquakes we know and experience. These are big earthquakes above 8, 9, 10 and big big ones. I don't think there is a scale to it. I didn't see the land split but big, big earthquakes, all happening at the same time. It looks the whole continent is shaking.

Normally, the earthquake prone regions are the rift valley and the horn of Africa but the major activity I saw was in the Congo area where there is an active volcanic activity. In a vision few years earlier, I have seen big earthquake in the same region.

As usual pray on this and seek the Lord for the truth.

Repent, Repent, Repent!
